

## **What's Happening Now - January 2013**

AITS has developed a mobile strategy based upon industry trends and emerging standards. It is AITS's goal to build long-lasting reliable applications as well as support campus initiatives as the campus mobile needs and strategies evolve. In order to better support its clients and users, it is imperative for AITS to be able to support mobile initiatives across the campuses. For more information on the AITS Mobile Application Strategy, visit [http://web.uillinois.edu/aits\\_mobile\\_application\\_strategy](http://web.uillinois.edu/aits_mobile_application_strategy).

In November 2012, AITS and University Housing at the University of Illinois Urbana-Champaign launched UI Dining, a mobile application that features the location details, menus, and allergen information of the full-service dining halls at UIUC: Busey-Evans, Florida Avenue (FAR), Ikenberry Commons, Illinois Street (ISR), Lincoln/Allen (LAR), and Pennsylvania Avenue (PAR).

In addition, users can view what's being served at the following specialty restaurants: Cracked Egg Café, Taste of Asia, La Cocina Mexicana, Field of Greens, Leafy!, Soul Ingredient, and Oodles. They can also see the schedule and available items at the following A La Carte locations: Busey Beanery, The Caffeinator, 57 North, CHOMPS, and Penn Station.
