The University of Illinois, chartered in 1867, welcomed its first class in 1868. The U of I has been the catalyst for many advances in science, technology and the arts. True to its core missions of teaching, research and service, the University is a leader in discoveries that improve the health, living conditions, learning environments, safety and security for all citizens of Illinois and beyond.

A few highlights:

- 21 Nobel Prizes and 20 Pulitzer Prizes have been won by alumni and faculty and University High graduates.
- The Urbana campus has a research and development program of nearly $450 million, placing it 19th in the nation.
- Chicago is one of four major research universities in the state and its medical school reaches to Peoria, Rockford and Urbana-Champaign.
- Springfield’s first-year students have the second highest academic profile and the highest second-year retention rate among Illinois’ 12 public universities.

Despite several years of budget cuts, the University continues to make advancements. Michael Johnson, professor of medicinal chemistry at UIC, received the largest grant ever awarded to a UIC researcher—$15.7 million, from the National Institutes of Health—to develop drugs to combat anthrax. In Urbana-Champaign, the 225,000-square-foot Thomas M. Siebel Center for Computer Science opened, uniting faculty, researchers, graduate and undergraduate students for the first time under one roof. And Springfield opened University Hall, which houses offices and state-of-the-art technology-enhanced and smart classrooms, seminar rooms, lecture halls and computer labs.
The University of Illinois at Chicago is a major research campus located in the heart of one of the world’s great cities. UIC is committed to providing a first-rate education for its students, to creating and disseminating new knowledge as a university of growing national and international stature and to serving its diverse communities and neighborhoods.
