The University of Illinois welcomed its first class in 1868. Since then, the University has been a major force powering the state’s economy. Today, it pumps $7 billion into the Illinois economy through payroll, research, construction, food, computers and other goods and services. Its nearly 70,000 students spend hundreds of millions more on food, rent, movies, clothing and utilities. When 30,000 employees spend their earnings, more jobs are created and some $2.4 billion flows through the Illinois economy.

Other ways the University benefits you:

- The University generates nearly 102,000 jobs in Illinois by employing professors, auditors, programmers, physicians, cooks, librarians, support staff and others. Spending by students and visitors to the three campuses creates another 90,000 jobs in construction, manufacturing and the service industry.

- U of I veterinarians treat more than 50,000 dogs, cats, horses, hogs, cattle, sheep and other livestock each year.

- Visitors, employees and students spend about $46 million a year on athletic and cultural events at the three campuses.

- More than 2 million Illinoisans benefit from classes, workshops, seminars and 4-H through Illinois Extension, including about 380,000 children and teens.

The University continues to make progress. The University ranks 10th among all public and private U.S. universities for federal money spent on research, and the U of I is the only U.S. public university to have two of its faculty win Nobel Prizes in the same year. The College of Medicine is the largest in the United States. One in every six doctors in Illinois is a UIC graduate. And every DVD in the world uses technology created by Urbana professor Nick Holonyak Jr.
